Dear Ms. Pini,

I received a copy of a fax from Winston Reid of the Space Station Payloads Office concerning a potential meeting to discuss the Alpha Magnetic Spectrometer Crew Operations Post (ACOP) payload integration plans. The Alpha Magnetic Spectrometer (AMS) Project Office would like to meet concerning the ACOP payload integration plans at the upcoming European Laboratory for Particle Physics (CERN) Technical Interchange Meeting (TIM).

Please contact Paul Nemeth to arrange an appropriate time.

Sincerely,

Trent Martin
AMS Deputy Project Manager
